Professional Summary

Full Stack Developer with 2+ years of experience building and shipping production applications across web and mobile. Skilled across the full stack .NET and Node.js backends, React/Next.js dashboards, and React Native and Flutter mobile apps published to Google Play and the App Store. Comfortable owning projects end to end, from API design to cloud deployment on AWS with Docker, Kubernetes, and CI/CD pipelines.

Work experience

Excellence Smart Solutions — Full Stack Developer

 January 2026 - Current  Jordan, Amman

- Delivered 8+ production applications end-to-end across healthcare AI, media streaming, e-commerce, and delivery/logistics, owning backend APIs, web dashboards, mobile apps, and cloud deployment.
- Built a medical AI diagnostic platform from the ground up: a .NET + SQL Server backend, a React.js dashboard, and a Flutter mobile app published to both Google Play and the App Store. Provisioned and managed the production infrastructure on AWS (EKS + EC2) and validated its scalability with a load test simulating 100,000 concurrent users.
- Single-handedly developed and launched a live TV streaming platform, a Next.js web app paired with a React Native (Expo) mobile app published to Google Play.
- Delivered a multi-vendor delivery platform from A to Z, including two React Native (Expo) mobile apps published to Google Play and the App Store.
- Built and shipped a mobile news-media content-creation app, distributed through Apple TestFlight for closed beta testing.
- Built the React.js 19 frontend for a real-time, large-format flight-tracking display for a major airline.
- Published a mobile e-commerce marketplace app to Google Play and the App Store.
- Led the development team on an AI language-learning platform, breaking work into Jira tasks, assigning them, and tracking the team's progress through delivery.

CSC Beyond — Full Stack Developer

 February 2024 - January 2026  Jordan, Amman

- Built and shipped 9 full-stack projects to production, spanning e-commerce platforms, admin dashboards, AI-powered tools, and marketing landing pages.
- Developed backends in Python (FastAPI), Node.js (Nest.js, Express.js), and PHP (Laravel), exposing both REST and GraphQL APIs.
- Collaborated within a large engineering team using Git/GitHub, code reviews, and Jira for task management.
- Set up CI/CD pipelines with GitHub Actions and used pull-request workflows to maintain code quality before staging and production releases.

Skills

Frontend: React.js, Next.js, React Native (Expo), Flutter, Tailwind CSS, Bootstrap, Sass

Backend: .NET, Nest.js, Express.js, Django, Flask, GraphQL

State Management: Redux, Redux Toolkit

Databases: SQL Server, MySQL, PostgreSQL, MongoDB, Redis, Firebase, RxDB

Cloud & DevOps: AWS (EKS, EC2), DigitalOcean, Docker, Docker Swarm, Kubernetes, Nginx, Apache, GitHub Actions (CI/CD)
